

Parametrix

Division Manager Position Environmental Engineering & Science Division (EE&S) Bellevue, Washington Office

Overview of the EE&S Division in Bellevue

As part of Parametrix, Inc. (www.parametrix.com), The EE&S Division is one of four operating divisions in the Bellevue office and is currently comprised of 16 individuals representing the core technical disciplines of civil/environmental engineering, hydrogeology and toxicology. Our EE&S Division has been and continues to be a leader regionally (Pacific Northwest), nationally and internationally delivering projects in solid and hazardous waste management (study, design and construction management), industrial air and water quality compliance, groundwater management and remediation, remedial investigation/feasibility studies (RI/FS), brownfields redevelopment, sediment management and remediation, and environmental and human health toxicology and risk assessments. In addition, the Division provides site monitoring and reporting and a full suite of field investigation services. The Division serves a healthy mix of public (state, city, county), private (mining & metals, refining, oil & gas, energy) and federal clients (EPA, USFS, USPS, USCOE, DOD).

Expectations for the Division Manager role

The successful candidate will provide effective leadership and experienced management for the diverse group of technical professionals (engineers AND scientists) that comprise the EE&S Division. The candidate will be expected to possess strong communication and demonstrated people management skills, be a collaborator, a mentor, technically innovative and creative, an example project manager, have a strong understanding of market drivers and be well networked in the public and private sectors as well as the consulting community. Preferably, the candidate will also bring new skills, clients or market knowledge to the Division, particularly with respect to new or emerging markets and/or technology.

Minimum education and experience

B.S. (and preferably higher) degree from an accredited four-year university; professional registration (PE, PG, etc); minimum 10 years related experience.

Submittal Requirements

For an immediate contact and more information, please call Sue Robinson during the NWMA conference at 425-691-0861, or email her at SRobinson@parametrix.com.

Alternatively, please submit a cover letter and resume to Laurel Wolfe, Sr. Technical Recruiter, via email to LWolfe@parametrix.com or apply online at www.parametrix.com
